## Orthopaedic Surgeon Looking for a Position Posted 12/29/21

### in Southern California

I am seeking a position as an Orthopedic Sports Medicine Physician. As a native of Southern California, I have a strong interest in returning to this region to start my career.

I am currently a sports medicine fellow at Rush University Medical Center and will complete my training in August 2022. I will be Board Eligible with the goal of obtaining both the Orthopedic Surgery Board Certification and the Subspecialty Certificate in Orthopaedic Sports Medicine through the ABOS.

My residency program has provided rigorous training at two different level-one trauma centers and a VA Medical Center. Our clinical experience is markedly high volume with good exposure to complex clinical and surgical situations. My residency has provided excellent training in the care of patients in both general orthopedics and sports medicine. My fellowship will provide more specialized training in shoulder, knee, and hip surgery. I look forward to an opportunity to speak or meet with you at your earliest convenience.

Please feel free to call me at 818-421-9862.
